High Pressure IP69K Waterproof HMI Panel PC 7900 Series

Highlights

Elegant and waterproof stainless steel IP69K Panel PC developed for industries with extensive cleaning and spray down. Very easy to clean and disinfect due to smooth sides, rounded edges and a narrow front bezel. Designed with special hygienic bolts on rear case enabling the market's fastest and most complete cleaning.

Designed for 24/7 operation, with low power consumption, passive cooling and without moving parts for maximum operational reliability. Screen sizes in 15.6" or 21.5" with auto-calibrated touch technology for seamless operation, even with gloves.

The rear side of the waterproof IP69K HMI supports tube and swivel arm mounting with internal cable wiring providing the market's best long term protection against high pressure water treatment.

Benefit from our experience from numerous installations around the world. Let us prepare a proposal that ensures the best functionality, ergonomics and occupies as little space as possible, such as integration with food processing equipment.

Reduce cost and time spending with our global partner model based on your specific requirements. Let Blue Line take responsibility for delivery on time. Blue Line's ultimate goal is to help our customers get peace of mind by handling all relevant details such as securing the right configuration, software setup, mounting, packaging, labeling etc. Ask for references from your industry.
